

SWARUP DAS

+91 73186 57035 | swarupdas2046@gmail.com | linkedin.com/in/swarup-das- | github.com/swarupdas2046-design

OBJECTIVE

Motivated and self-driven BCA student with hands-on experience in full-stack web development using the MERN stack (MongoDB, Express.js, React.js, Node.js). Passionate about building real-world applications end-to-end and eager to contribute to impactful projects through an internship or entry-level role. Quick learner with a strong foundation in JavaScript, REST APIs, component architecture, and responsive UI design.

EDUCATION

Amity University Online

Bachelor of Computer Applications (BCA)

2025 – 2028

CGPA: 7.20 (1st Year)

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C

Markup & Styling: HTML5, CSS3, SCSS, Tailwind CSS

Frontend: React.js, React Router, React Hook Form, Context API

Backend: Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT Authentication, bcrypt

Tools & Platforms: Git, GitHub, VS Code, Vercel, Postman

Concepts: MERN Stack, Component-Based Architecture, State Management, REST API Design, Role-Based Access Control, Protected Routing, Password Hashing, Responsive UI Design

PROJECTS

E-Commerce REST API with Authentication | *Node.js, Express.js, MongoDB, JWT* | [GitHub](#)

- Built a full-stack REST API for an e-commerce platform supporting complete CRUD operations on products
- Implemented secure user authentication using JWT (JSON Web Tokens) with protected routes
- Used bcrypt for password hashing to ensure secure credential storage
- Designed MongoDB schemas using Mongoose with relationships between users and product data
- Structured the codebase using MVC architecture with separate layers for routes, controllers, and models

Blog Platform | *React, Context API, React Hook Form* | [Live Demo](#)

- Built a full-featured blog platform with user authentication and role-based access control (Reader / Author roles)
- Implemented protected routes and a dedicated author dashboard for managing articles
- Developed create, edit, delete, draft, and publish functionality for articles
- Used React Hook Form for optimised, performant form handling with validation

Add to Cart System | *React, React Router, React Hook Form* | [Live Demo](#)

- Developed an e-commerce style cart system supporting item quantity management and cart state
- Implemented declarative client-side routing using React Router for a seamless multi-page experience
- Built a complete login and registration flow using React Hook Form with input validation

Study Session Tracker | *React, Context API, Local Storage* | [Live Demo](#)

- Created a study session tracker using Context API for global state management, eliminating props drilling
- Integrated Local Storage for persistent data across browser sessions without a backend
- Designed a fully responsive UI ensuring consistent usability across devices of all screen sizes

Music Player | *JavaScript, HTML5, CSS3* | [Live Demo](#)

- Built a functional music player with play, pause, next, and previous track controls from scratch
- Implemented audio handling via the HTML5 Audio API with dynamic UI updates on track change
- Focused on core web fundamentals: DOM manipulation, event handling, and vanilla JavaScript

STRENGTHS

- Fast learner with a strong self-study ethic
- Ability to ship end-to-end frontend features independently
- Problem-solving mindset with attention to UI detail
- Consistent open-source activity on GitHub

RELEVANT COURSEWORK & LEARNING

Core Subjects: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks

Self-Learning: React.js (Hooks, Router, Context API), Node.js & Express.js, MongoDB & Mongoose, REST API Design, JWT Authentication, Git & GitHub workflows
